SCVIEW

Northeast Blueprint provides world-class hosted imaging and content management services that help streamline business operations by converting traditional, document-intensive business processes into a more efficient digital-based approach. Access to information is fast, accurate, and secure.

Our hosted services leverage the SCView Content Platform to provide extensible and scalable solutions. As a result, organizations can combine the strength of a central content repository with the flexibility of an on-demand Web application, eliminating the often project-prohibitive investment required to create a sound technological infrastructure. Our turnkey solution can be implemented in hours and mastered in minutes. Deploying SCView's world-class hosted environment makes it possible for departments or entire enterprises to quickly begin managing content-centric processes to increase efficiency, improve productivity, support compliance initiatives, reduce operational costs and free resources for higher value tasks that increase revenue and improve customer service.

GREATER PRODUCTIVITY, GREATER RETURN

SCView makes your documents as safe as they are accessible.

- » Reduce records management costs
- » Enhance security and compliance
- » Simplify disaster recovery
- » Avoid extra hardware, software and IT costs

THE OUTSOURCING OF NON-CORE BUSINESS FUNCTIONS CAN BE A VITAL STEP TOWARDS INCREASING EFFICIENCY IN YOUR ORGANIZATION

TODAY'S CHALLENGES

In your current working world, most tasks are driven by one common factor — paper. Whether it's records, documentation, files or paperwork, the results are the same — inefficiency, wasted time, costly processing and storage. The information you need to complete your job activities may be in a number of formats in a number of places. SCView helps you complete your daily tasks faster and more accurately by putting information at your fingertips, allowing you to spend your time using information not searching for it.

CONSIDER THE ELECTRONIC DIFFERENCE:

- » Reclaim productive space and eliminate cabinets and shelves with digital document storage
- » Instant records access with intelligent search, retrieval and distribution
- » Assists with disaster recovery and data integrity
- » Comprehensive security protects records from unauthorized use
- » Simplified integration with information systems and other applications in use
- » The cumulative benefits of saved time, reduced costs, and enhanced security

SCANNING SERVICES

Northeast Blueprint is focused on the first and most vital step in information management: consistently capturing the various types of data that exist throughout your organization, in the highest quality possible, and indexing it all so you can easily find it again. From document conversion services to electronic storage and delivery, we will customize a document management plan to suit our customers' needs. Clients save space and money with our off-site options or utilize the experience and efficiency of our on-site specialists. We are able to:

- » Purge, box and arrange for daily, weekly, monthly pick-ups of documents
- » Offer up to six months of storage at no cost (including free retrievals)
- » Present all requested documents to your facility in under four hours
- » Customize all indexes or search parameters to your needs
- » Scan all documents in a non-proprietary format
- » Offer secure off-site data replication to prevent against any disaster
- » Offer customer support 24 hours a day, 7 days a week
